

**COOL GADGETS of the Month**

by Mr. Gadget  
DonW

# Mixtape Memory Stick

- Mixtapes are an art lost in a dead medium
- Looks like a cassette but holds hundreds mp3s
- Personalize the package with your playlist
- Packaged to look like an old analog audio cassette tape, with room to scrawl out your tracklist, the USB Mixtape Memory Stick makes the perfect gift to your significant other.

# Android Speaker Dock

- Great sounding speaker dock works with almost any Android phone
- Includes micro IR remote to control music volume, track forward/back, and mute
- Micro USB and 3.5mm audio connectors combine to give you plug-and-play operation with virtually any Android-based phone

# Near - Field\* Audio Speaker

**No wires, no pairing, no problem!**

- Boost your iPhone or Android device with no wires or pairing
- Near-Field Audio amplifies any speaker into room-filling sound
- Runs for months on standby on AA batteries or forever over micro-usb power

**\* it picks up the magnetic field of the speaker It does work with earbuds, but just not as loudly.**

# Earbud Knitting Kit

A truly awesome earbud organizer would not only roll up into a untangled mess in a little package, but also be a cross body bag to hold your iPod or iPhone.

These earbuds aren't connected to the case, so they are just something that makes your earbuds more bulky, but less tangled.

# BackPack Google Map Maker

Google introduced an enormous backpack with a big green, globular camera protruding from the top.

Google can use it to capture images in remote places like national parks .. Inside Buildings .. Etc.

# Small Room Technology

Since 2000, Resource Furniture has imported and distributed inspired, modern furniture from the finest and most innovative European designers.

Every piece in the Resource Furniture collection is hand-selected for its ability to transform a space with both beauty and functionality.

Resource Furniture continues to redefine the way consumers and designers think about space.

# Tracking Security Light

Other lights may simply turn on when motion is sensed but the Motion Tracking Security Light. goes above and beyond that.

This light **automatically swivels to follow people** as they move around your yard. The light detects body heat up to 40 feet away with it's wide angle infrared sensor which even has extra sensors aimed below the unit.

It's lit by **LED lights** and can be wall or eave mounted and hardwired directly to an existing electrical box. The swiveling allows this light to offer more coverage than a normal light and a moving light can go a long way towards warding off trespassers from your yard.

# iPhone And iPad Charging Speaker Dock

This is the speaker dock that charges an iPhone and iPad simultaneously.

Two dedicated 30-pin dock connectors hold each device upright, providing a convenient charging platform that requires as little space as a box of tissues.

The dock plays music from either device through the unit's dual integrated stereo speakers, allowing you to watch videos or listen to a music collection while the iPad and iPhone charge.

With USB and 3.5 mm auxiliary ports (cables included) that allow connection to an iPod or other MP3 players. Compatible with all iPhone, iPad, and iPod Touch models. Plugs into AC via iPhone/iPad wall adapter.

# Turn CD Cases Into Artwork

Here's an interesting product that turns your old CD cases into works of art.

Case-On's are essentially small clips that are specifically designed to fit CD jewel cases and clip them together.

You probably have tons of CD cases stashed away somewhere after you made the transition to MP3 full time (I know I do).

What if you turned each one into a little picture frame? Case-On's does that.

They cost \$10 for a set of 40 clips.

# iGroove SXT iPod Speaker System

The iGroove SXT remains a true stereo sound system that employs dual long-throw 2.5-inch woofers in a ported enclosure and dual  $\frac{3}{4}$ -inch horn-loaded tweeters.

**Klipsch is the only company in the iPod speaker category to utilize horn technology a design that delivers lifelike sound as well as produces more output using less energy.**

And unlike before, the iGroove SXT iPod speaker **system is now bi-amplified** which means each driver is individually amplified a feature that virtually eliminates distortion and significantly improves sonic performance.

We've also re-tuned the bass ports on the sides of the system to remove any "port noise."

\$170.00

# Butter Mill Gives You Ribbons of Butter

The Clear Butter Mill gives you a smooth ribbon of butter, cream cheese or margarine with just the twist of the handle.

It works right out of the refrigerator, no need to let your butter sit out to get a smooth cut. You can make a 10 foot long ribbon of butter from one stick (why you'd want? I don't know, but you could).

**Cold butter never wants to spread very well, this clear butter mill makes it easy to butter that bread, vegetables, or on top of steak (try it, trust me!).**

It's dishwasher safe and because there's very little air in this gadget, your butter stays fresher. If you like butter, (and who doesn't?), this looks like a must-have kitchen accessory

# Nathan's Hot Dog Vending Machine

Great news for hot dog lovers; **Nathan's Famous Coney Island hot dogs** are coming soon to a vending machine near you. The machines are being run by Kosher Vending Industries the leading Kosher vending machine operator.

The hot dogs will all be certified as Kosher (all Nathan's Famous franks are beef, but relatively few are produced and served under a rabbi's oversight).

**The vending machines will get the dogs grilled and the buns warmed within 34 seconds.**

Now if only they could get Nathan's french fries into one of these machines (complete with little red pitchfork style fork, natch).

# What is it ???

# MITRA PC

... is a cylinder-shaped portable computer. It was designed for rural areas in India in order to spread the importance of education, health and other social issues for the development of the country.

The term “mitra” means “friend,” and the MITRA PC is also an eco-friendly gadget that uses solar energy to store and use in case of emergency.

The MITRA PC contains a built-in LED projector for convenient presentation, as well as a hand crank charging facility to generate power (rotating the crank 30 times provides 30 minutes of use).

# Ondus Digitecture wall Mount faucet

If you are looking for a faucet that brings everything you need for the bathroom onto one sleek panel, this Ondus Digitecture by Grohe is the right choice for you.

This faucet is designed with slim wall mount panel that add a futuristic dimension to your modern bathroom. This is the newest addition of Grohe Ondus Digital Faucet Collection.

This faucet is designed including temperature control, touch pad operation, an attractive faucet and holders for soap and cups.

# Your next HOME ?!?

As our planet becomes more Hostile

As we develop FUSION Power sources, we will be able to build and live in SHIELDED CITIES, such as this one.

Wouldn't the VIEW be Spectacular from any Apartment in this super building.

# TalkTalk - the Search Engine of the Future

## News of Future

Future News for Year 2020 and Beyond

**February 7, 2035** - After a lot of hush-hush for several years the much longed for search engine TalkTalk was presented to the press this week. One day talking basically made me speechless; the future has never looked brighter in finding information.

TalkTalk will open to the public next week and this service will be something that you will use more than you can imagine. **For the first time you can not only talk to the search engine, you can discuss with it what you are looking for.**

# NIX 8" Hu-Motion frame

\$120.00

The future has arrived with the NIX 8" Hu-Motion frame. Killer styling from the design studio 'NIX of London' is coupled with the latest tech to deliver the ultimate in convenience, featuring a motion sensor that turns the frame on when you're nearby and off when you're not. It really couldn't be any more convenient.

This frame makes a perfect gift for technophobes, no longer will a frame sit around grandma's house unused!

**A rechargeable battery provides portability with 3hrs playback time.** Stylish azure blue touch controls on an obsidian black frame provides for a modern yet elegant look complimenting most interior decors.

# Voice Clarifying Amplifier

Improve your hearing; improve your life, with this digital Voice Clarifying Amplifier. Micro-digital is the latest technology; it captures sound and amplifies it as it travels through your ear.

**This doesn't just make sound louder, it makes it clearer** so you can truly hear what you're missing. Features adjustable volume control, and fits in either right or left ear. Great for mild to moderate hearing loss.

The Voice Clarifying Amplifier is rechargeable. When charged, it lasts between 6 and 10 hours. Comes with everything you need for charging, cleaning, storage, travel – and even a quick start guide.

\$300.00

# Adjustable Tablet Stand

This patented design allows you hands-free usage of your tablet or iPad while you recline in your favorite chair, or even lie down in your bed.

Cantilever design requires zero clearance under your furniture, and can be used on either side of bed, sofa or chair.

Six positions practically give you unlimited possibilities for watching or using your iPad or tablet while you relax and recline. All done?

The Adjustable Tablet Stand quickly folds and stores anywhere. Works with your iPad, Kindle, Galaxy, Xoom, Iconia, IdeaPadd, Nook and all other tablets and eBook readers.

\$160.00

# Solar Charging iPad Case

\$200.00

With the Solar Charging iPad Case having more than 10 days of battery life is just the beginning.

This innovative case does it all – a protective case for your iPad2 or the newest iPad that can be configured into a keyboard stand for easier typing or a movie stand for watching films or TV.

**In addition to charging the iPad from either indoor or outdoor light it features a USB power outlet that will charge headsets, cameras, or cell phones.**

Plus it includes an **HDMI adaptor** for viewing movies or surfing the web on your **HDTV**. The Solar Charging iPad Case is like a Swiss Army knife for your iPad!

# The Nest Learning Thermostat

\$250.00

# The STANDING ?? Desk

You've probably heard by now that sitting at your desk is killing you. No? Allow me to elaborate.

The average person spends a third of their life sitting down, which lowers blood sugar, decreases blood flow, and puts you at risk for diabetes and heart disease.

Some doctors even call our culturally ingrained inactivity "Sitting Disease," which seems a little dramatic, but there's truth in it.

Focal incorporates a small bench into the traditional standing design, not unlike drafting tables used by architects and engineers.

The small leather seat is more for leaning than sitting. It tilts downward at an angle that makes it tough to totally rest, and it pivots with your movements, improving balance and, ostensibly, focus. The station's plywood and aluminum desk is attached at its base to a footrest that tilts up towards the user for support.

# Sony Cyber-shot DSC-HX20V Digital Camera

\$400.00

... is an advanced point-and-shoot that has 18.2Mp, 40x Clear Image Zoom, and Active 3-Way stabilization to its credit, not to mention 1080/60i HD video capture. In addition, the HX20V also provides you with GPS and compass functionality for geo-tagging and more! When you consider all the auto features of the camera as well, you'll find the HX20V is more than a snapshot machine, it's a real memory-maker.

Those 18.2Mp just don't work alone to provide you with stellar images, they have the help of High Speed AF - for clear photos, even in low-light - along with all the aforementioned features. Other notable features include the Sony G lens and a 3.0" Xtra Fine LCD TruBlack display.

The camera also puts a 10 fps burst mode at your disposal, and numerous auto functions for great photos without the guesswork. Face detection, Anti-blink, iSCN, Natural Flash and more all work hard to ensure that your memories will be beautiful for years to come.

# Last Moment Robot: 'End of life detected'

**As a woman lies on a mattress on the floor, a small white machine attached to her outstretched right arm offers the following words:**

*I am the Last Moment Robot. I am here to help you and guide you through your last moment on Earth. I am sorry that your family and friends can't be with you right now, but don't be afraid.*

*I am here to comfort you. You are not alone, you are with me. Your family and friends love you very much, they will remember you after you are gone.*

# Antbots to the Rescue!

In the aftermath of a major disaster, the last thing you want to do is send first responders running into mounds of unstable, potentially dangerous rubble.

But right now, if rescuers want to look for survivors, measure radiation levels, or just see what's going on inside, they don't have many other options.

Nuno Martins, an associate professor of computer and electrical engineering, and his fellow researchers at the University of Maryland Robotics Center think the best way to solve this problem is with robots. Hundreds of tiny, ant-sized, autonomous, communicating robots. [ReadMore >>](#)

# Nintendo reveals Wii U, 23-Games

The Wii U is a next-generation video game console from Nintendo. It has an innovative controller with a tablet, which makes for a lot of interesting gameplay possibilities.

**W**ith a new tablet controller to allow for dual screen playing and more interactivity, the new Wii U seems to be a clear heir Nintendo's popular Wii system.

The purpose of the Wii U gamepad is creating a gaming experience independent of the television.

The device powered by an IBM Power-based multi-core processor with an AMD Radeon-based GPU allows for quick access to games along with unique dual screen capabilities.

\$300.00

# Cheaper LED Lightbulbs Are on the Way

**Silicon backing should make high-efficiency lighting more affordable.**

Cost has been a major barrier in keeping people from buying energy-efficient LED lightbulbs.

Now one of the world's largest LED makers, says it has perfected a technique that could significantly cut the production cost of LEDs.

White LEDs are typically made by coating blue gallium-nitride LEDs with yellow phosphors. Manufacturers normally grow the gallium-nitride in thin layers on top of costly sapphire substrates. Osram is making the devices on silicon substrates instead.

Silicon substrates cost a third as much as sapphire and could get even cheaper, since they're made in larger pieces.

# eCAT Cold Fusion Revolution

## How does an ECAT work?

In short, the ECAT produces the energy by fusing Nickel with Hydrogen to produce Copper. This reaction is exothermic, which means that it produces excess energy. The energy content of the Copper is less than the energy content in Nickel and Hydrogen alone – and the excess energy is in this case being released as heat energy.

The current design of the reactor is a small rectangular plate 20cm x 20cm with a thickness of about 4cm (external dimensions of reactor). The fuel, Nickel of very fine granularity + Hydrogen + catalyst, is placed in a thin layer at the center of the reactor core. The reactor is located at the bottom of a steel box (the outer hull of the E-Cat is currently at a size that can easily fit on a small table) and directly attached to the reactor is cooling elements in the form of wings. These wings are crucial as they transmit the heat generated in the reactor to the surrounding water.

There is a cold water inlet into the steel box and a warm water outlet. As the cold water flows past the reactor, the cooling elements will heat it up and the flux of the water (e.g. liters/h) dictates the difference between in and out temperature. In this way hot water or steam can be produced.

## E-Cat World

Following the Low Energy Nuclear Reaction Revolution

# Contact Lens Helps you “See” Blood Sugar Levels

The **contact lens senses the glucose in your tears**, and if the sugar is not being metabolized correctly and glucose builds up in your body **the lens will detect the problem and change color**. Dr. Jun Hu explains that “it works just like the PH paper in your high school chemistry lab” Of course the person wearing the lens won’t see the change unless they look in a mirror. In order to measure actual blood sugar concentration, one would use a Smartphone app that analyzes a photograph of your eye.

The lenses have been under development for several years, and the only ones that exist are simply a prototype not yet approved for human use, however if the researches can cut through the red tape you might start hearing more about these lenses in 3 years or so. No word yet on price, but it looks like they would charge for the lenses and present the associated app at no charge. Very cool.

Eye candy.  
For diabetics.

# The Video Surveillance Clock

\$160.00

This is the analog clock with a built-in, motion-activated video surveillance camera that records audio and video, ideal for inconspicuously monitoring a room or office.

The video camera's image sensor captures 720 x 480 resolution video in a 62° angle from nine feet away while its sensitive microphone picks up sound from 16' away. It can also take photographs at 1,280 x 960 resolution. An included 4 GB microSD card stores up to six hours of AVI video or 52,000 JPG images; supports up to 8 GB microSD cards.

Content is downloaded to a computer and its rechargeable lithium battery is recharged via a USB 2.0 port and included cable. Provides up to 1 1/2 hours of video recording (18 months of stand-by time) from a three-hour charge.

# The Professional's Image Restoring Digital Slide Converter.

This is the scanner that converts and restores 35mm slide images to their original quality. Its magazine accepts up to 50 slides at a time, scanning them automatically one-at-a-time, enabling large-scale conversion projects, and each slide may be previewed using the built-in light panel.

A full 5,000 x 5,000 dpi resolution scan-its highest setting-of a single slide takes just over three minutes, capturing all the details of the original image at 34 megapixels.

Once converted, **the software removes surface defects such as dust and scratches from an image (after the scanner's infrared sensor detects dust), restores original colors from faded film images, and removes film grain from converted images.** Images are saved onto a computer using the included USB cable. Includes Adobe Photoshop Elements 9.0 software

\$1300.00

# AIRbudz Earbuds Enables Ambient Noise to Come In

**Just how do the AIRbudz work?** For starters, they come with air channels that are built right into the earbuds, enabling you to simultaneously hear music without any distortion, while enabling ambient noise to make its way into your ears. It is said that the AIRbudz will be able to fit approximately 70% of headphones with removable earbuds which are in the market right now, so you might want to look into replacing the noise canceling earbuds.

# Mobile DJ Car
