

Internet TV Presentation Notes
By Jamie Leben
September 12, 2009

Internet Television (IPTV) is a collection of services that enable you to watch television programs on an Internet-connected PC

Hardware needs:

- Fast Internet connection (1.5 Mbps or greater download speed)
- 1 GB RAM or greater
- 2-year-old or newer processor

Options for watching TV through the Internet:

Any Computer:

<http://www.hulu.com>

<http://www.joost.com>

<http://www.youtube.com>

<http://wwitv.com/>: streaming TV stations from around the world

[http://en.wikipedia.org/wiki/Category: Internet_television_channels](http://en.wikipedia.org/wiki/Category:Internet_television_channels) other IPTV channels

Windows

Included in Vista (or Win 7) Home Premium or Ultimate Media Center > Extras > Internet TV

Windows, Mac, Linux

Boxee*

<http://www.boxee.tv>

Boxee is a free program designed to work from a distance with a remote (like windows Media Center) that gives access to multiple IPTV services (Hulu, Joost) and other media on your PC and network.

*Only works on 32-bit Windows currently
