The best GADGETS

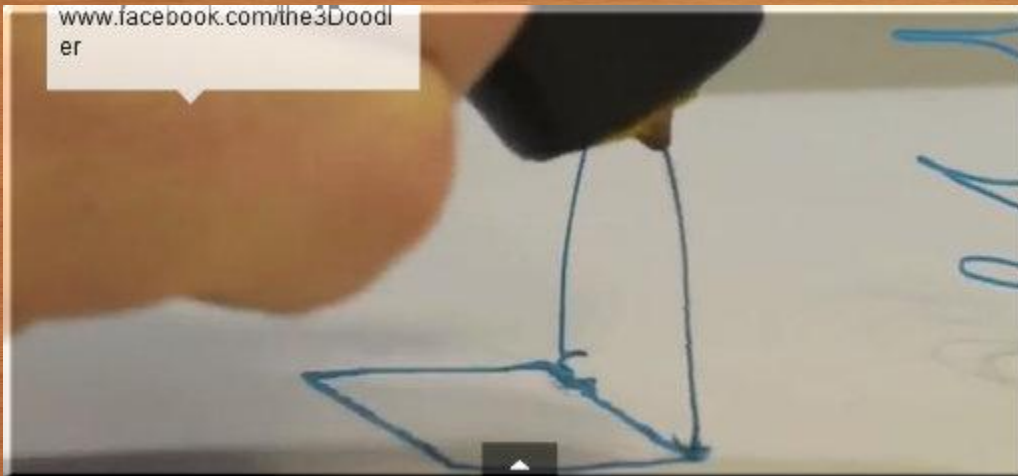

Samsung Galaxy Note Pro

This massive 12.2" tablet is Samsung's answer to both the iPad Air and the Surface 2. Samsung has taken Android and placed what they call the Magazine UX on top of it.

It takes the best parts of Windows 8's live tiles and is a big improvement over most of Samsung's typical TouchWiz Android skins.

3Doodler

This 3D printing pen takes all of the modeling out of 3D printing and opens up creating objects to pretty much everyone—including kids. While you might not be able to do quite as much as you could with an actual 3D printer, it's a heck of a lot of fun to play with for only \$99.

Mophie's Space Pack

Mophie, best known for its battery-packing iPhone cases, outed an entirely new class of product at CES that not only charges phones on-the-go, but adds up to 32GB of extra data storage accessible by iPhone or computer.

Sony 4K Ultra Short Throw Projector

4K Ultra Short Throw Projector

Wireless Touch Speaker 4 SmartPhones

z

All you have to do is touch your smartphone against the speaker to hear amplified music.

BoomBox features new audio technology called NearFA that's compatible with all iOS and Android smartphones, MP3 players, and other small devices.

Samsung Galaxy Note 3

This is a Note, so there's a stylus built into the body, called the S Pen. It's so you can annotate the screen, for instance. As you pull it from its snug holster the Note 3 recognises you've done this and launches a special menu called Air Command. The options in the menu include Action Memo.

Samsung Galaxy Gear Smartwatch

The Bluetooth range is good. The Galaxy Gear's main use is to notify you of happenings on your phone. With text messages, you'll be able to receive and reply using S Voice but with emails and Twitter notifications, there's no preview. You'll only be told that you need to check your phone and deal with it there.

Mini Business Card File Cabinet

- **World's tiniest filing cabinet - only 6.5" tall**

- **Holds up to 500 business cards**

- **Letter tabs keep your contacts organized**

Giant Flip Clock

Safe Kitchen Timer

Clipline Picture Frame

A fun and modern picture frame features a clothesline with eight mini clips for a fresh way to display your favorite photos or keepsakes.

•20" x 17".

V2V technology

US unveils plan for cars of the future

The National Highway Traffic Safety Administration, which has been working with automakers on the technology for the past decade, estimates vehicle-to-vehicle communications could prevent up to 80 percent of accidents

Cheater Chopsticks

These "cheater" chopsticks are great for people who have a hard time using regular chopsticks. You can also use these 9 inch long chopsticks as toaster tongs or as serving utensils! Notice the grooves on the tips for a better grip.

LED Flashlight Photography

How To Make An "Ice Light."

Let's be clear...from a photography perspective, it's too bright and harsh to shine directly at anything or anybody. So, you need to use a lighting modifier to diffuse it or use it in conjunction with a reflector.

LED Flashlight Camera Recorder

Motion-Activated Yard Sprinkler

Yard Enforcer:

Water sprinklers are great for keeping animals out of the yard because most of Mother Nature's creatures aren't really into getting spritzed by water.

Desktop Nap Pillow

Whether on the go or at the office, this pillow is perfect for instantly converting your desk or the airport cafeteria table into a comfortable place to catch a quick snooze.

Far more comfortable than your average neck pillow, you'll feel so at ease with your head in its new case that you'll be opting for more time under the hood.

International Space Station on UStream

**Look for MOVIE
in Web Site**

Live Space Station Video includes internal views from cameras in the International Space Station's Destiny Laboratory and Harmony module when the resident astronauts are on duty. Earth views from external cameras on the station's structure will be available during crew off-duty periods.

The video will be accompanied by live audio of conversations between the crew and the Mission Control network.

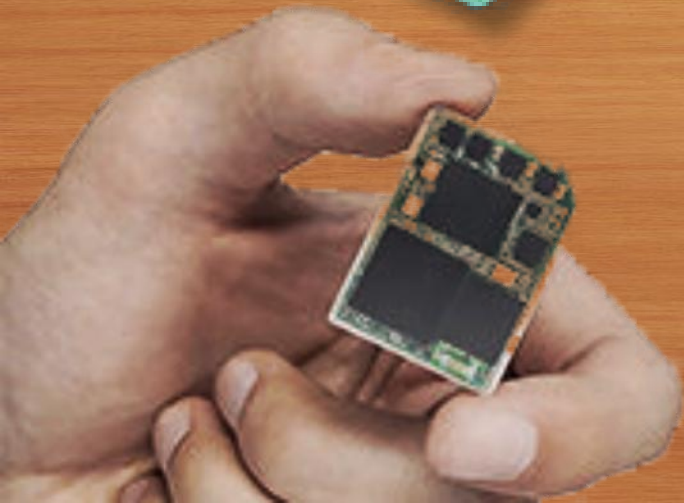

The SD* card-sized computer

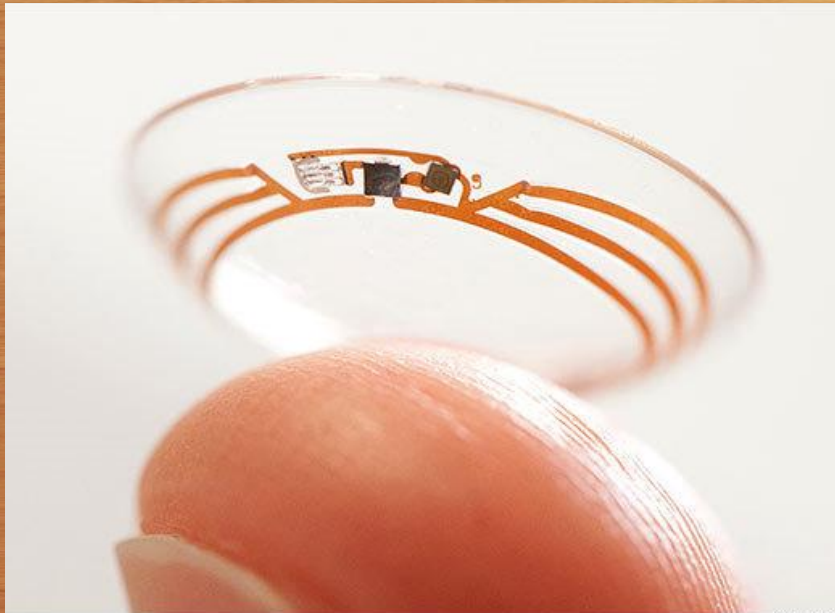

It can be designed to work with most any device—not just computers, phones, or tablets, but chairs, coffeemakers, and even coffee cups. The possibilities are endless for entrepreneurs and inventors of all kinds.

The Intel Edison board features a low-power 22nm 400MHz Intel® Quark processor with two cores, integrated Wi-Fi and Bluetooth*, and much more.

The unique combination of small size, power, and rich capabilities makes the Intel Edison board a game changer, lowering the barriers to entry for thousands of visionaries.

Keeping a Watchful EYE on your Glucose Levels

The contact lens uses a tiny processing chip and a specialized glucose sensor, in conjunction with an antenna that is actually thinner than a human hair.

When this contact is worn, the sensor detects glucose levels in the wearer's tears, taking readings once per second, with the transmitter sending these readings to an external device.

Imagine, constant feedback on your glucose levels, no pokes required.

Bluewave Bluetooth Audio Receiver

The Bluewave Bluetooth Audio Receiver is an adapter that converts any iPhone Speaker Dock into a wireless speaker system compatible with iPhone, iPad, iPod Touch, Android, Windows Phone, Blackberry, and more!

You did just read that correctly. Go back and find that iPhone dock that made you cry, Android friends.

You can has nao! After a quick and easy setup, you'll be able to use that iPhone speaker dock with any Bluetooth capable smartphone.

You don't even need to dock your device: just walk in range and your tunes will happily blast forth from the speaker dock.

What Your Gadgets Really Say About You

Has anyone any questions? If NOT ---
